

Moisture  
Management  
for Masonry

Your reputation. Your legacy. Our mission.

## Technical Data Sheet

### Description

WeepVent for masonry cavity walls helps ensure that moisture can migrate out and air can circulate into the cavity, and that insects can't enter the cavity through the weep holes. The product's compressibility means it can completely fill the weep holes, and "prickly adhesion" holds the WeepVent in place without fasteners or adhesives.

### Features

- 90% open-weave polyester mesh
- Available in Brown, Red, Tan, Almond, Gray, White and Black
- Custom sizes and cuts available on request

### Standard Sizes and Packaging

THICKNESS	HEIGHT	LENGTH	UNITS/BOX
1/2"	3-1/2"	2-5/8"	125
